

Dear Teacher,

This year, on Thursday 1 November 2018, Outdoor Classroom Day QLD is happening across the state and I'd love for our class to be a part of it. It is supported by the Queensland Government and hosted by Nature Play QLD.

There are lots of benefits to outdoor learning, such as stimulating my motivation for learning, improved engagement and activates creative thinking.

If you're interested in being a part of this day, please consider pledging our class at www.outdoorclassroomdayqld.org.au. They even have complimentary outdoor learning lesson plans, specifically created by Nature Play QLD for this event! They're available for every grade and it's linked to our Curriculum.

When you pledge, can you kindly also order a free Nature Play Passport for each of us so that we can continue outdoor learning and nature play after Outdoor Classroom Day has passed?

Other benefits of learning outdoors include:

- Improves physical and emotional health,
- Builds social skills and team work,
- Engages children in learning,
- Builds creativity and resilience,
- And, It's fun!

It also supports the drive to get children back outside: to get less screen time and more green time!

As a teacher, you can pledge our school's support for Outdoor Classroom Day and be counted as part of the global movement to get children back outside by visiting www.outdoorclassroomdayqld.org.au.

Thank you for getting us involved!
